Put in a negative way, the aim of leadership is not merely to find and record failures of men, but to remove the causes of failure: to help people to do a better job with less effort." W. <u>Using Transfer Factors</u>

SEMINAR

for the **Immune System**

- Balance, Build and Support borrowing from the cow and chicken's bigger educated immune systemtransferring factor to your own cells.
- Raise Natural Killer Cells, which helps you fight off harmful pathogens.
- Doctor's can look it up in their books. (to see that there are no negative side effects to drugs.)

Speaker: David Crist 2:00- 2:45, Friday, the 28th

"We have seen many positive changes in people,

short of miracles. Since the immune system is the hub of the body, many invaders have to leave once subjected to a more educated immune system. It also balances an overactive immune system, which helps many people. It isn't easy to find a product that can balance and raise the immune system! Here you will find both in one product."

Transfer Factor is filtered from the colostrums of a cow, which contain all the cow's education the calf needs to survive in the barn. It is loaded with the ability to fight off many pathogens, since the cow already fought off many of them and has its antibodies. We get to borrow from that overcoming power and in turn get more ability to fight well if we face the same invaders. Come hear David explain how that can work for you! We also carry many other products. Pick up a catalog and ask questions at our booth and perhaps win some free product!
